

Smit Parekh

Full Stack Developer | Node.js + React Specialist | 4+ Years

Results-driven Full Stack Developer with 4+ years of experience building enterprise-grade, scalable applications using Node.js, NestJS, React, and Next.js. Expert in TypeScript, microservices architecture, RESTful APIs, and cloud-native solutions. Proven track record delivering production systems across FinTech, AI/ML Platforms, SaaS Analytics, Pharma Tech, and Legal Tech domains. Strong background in test-driven development (Jest, Mocha), DevOps practices, Docker, Kubernetes, and database management (PostgreSQL, MongoDB, Supabase, NeonDB). Collaborative team player with excellent problem-solving skills and commitment to clean code principles.

TECHNICAL SKILLS

- **Backend Development:** Node.js, NestJS, Express.js, RESTful APIs, Microservices, Event-Driven Architecture
- **Frontend Development:** React.js, Next.js, Redux, JavaScript ES6+, HTML5, CSS3, Tailwind CSS, Bootstrap
- **Programming Languages:** TypeScript (Advanced), JavaScript, PHP, SQL
- **Testing & Quality:** Jest, Mocha, Chai, Jasmine, Sinon, Unit Testing, Integration Testing, TDD
- **Database Systems:** PostgreSQL, MongoDB (NoSQL), Supabase, NeonDB, SQL Database Design & Optimization
- **DevOps & Cloud:** Docker, Kubernetes, AWS, Vercel, CI/CD Pipelines, Git, GitLab, Bitbucket
- **Architecture & Design:** Microservices, Serverless, Design Patterns, SOLID Principles, Clean Code
- **Validation & Type Safety:** Zod, TypeScript Type Guards, Runtime Validation
- **Tools & Collaboration:** Jira, Slack, Zoho, Asana, Agile/Scrum Methodologies

PROFESSIONAL EXPERIENCE

Monarch Innovations | Full Stack Software Developer | Jan 2026 – Present

- Developing enterprise FinTech platforms (Satchel Inc suite: liquidity.io, simplici.io, equitytable.io) using Node.js, NestJS, Next.js, TypeScript, PostgreSQL, Supabase, NeonDB with microservices architecture.
- Implemented type-safe RESTful APIs using NestJS and TypeScript, with Zod validation ensuring data integrity across complex financial workflows and compliance requirements.
- Built comprehensive unit and integration test suites using Jest and Mocha, achieving 85%+ code coverage and reducing production bugs by 40%.
- Architected event-driven microservices using Node.js with Docker containerization and Kubernetes orchestration for scalable, resilient systems.
- Collaborated with cross-functional teams following Agile methodologies, delivering high-quality features for white-label clients including VC Cross and Morning Line Capital.
- Optimized PostgreSQL and Supabase database queries and implemented caching strategies, improving API response times by 60% and supporting 10,000+ concurrent users.

Cilans Systems | Full Stack Software Developer | Aug 2024 – Dec 2025

- Promoted to full-time developer, architecting production-grade applications using Next.js, Node.js, TypeScript, and NestJS framework with focus on clean code and SOLID principles.

- Led development of AI-powered platforms (GranthAI, Infobricks, Insightifi) implementing microservices architecture, RESTful APIs, and real-time features using Socket.io.
- Established testing best practices across projects using Jest, Mocha, and Chai, writing effective unit tests and implementing CI/CD pipelines with automated testing.
- Developed and maintained HRMS, CredLinkDN, JSBN Admin Panel, and SimplCase using Node.js backend with MongoDB/PostgreSQL/NeonDB, ensuring high performance and 99.9% uptime.
- Utilized Docker for containerization and worked with DevOps tools for deployment automation, reducing deployment time by 70%.
- Applied design patterns (Singleton, Factory, Observer) and followed clean architecture principles, resulting in maintainable, testable codebases.

MarketiXpert | Full Stack Developer (Freelance) | Jan 2024 – Present

- Architected and developed marketixpert.tech using Next.js frontend with Node.js/Express backend, TypeScript for type safety, and PostgreSQL database.
- Implemented comprehensive testing suite using Jest and Mocha with 90% code coverage, ensuring robust application behavior.
- Deployed on Vercel with automated CI/CD pipeline, implementing performance monitoring and achieving sub-2-second page load times.

Content Beta | Digital Marketer & Video Editor | Apr 2023 – Jan 2024

- Created engaging video content and managed SEO/social media marketing campaigns, developing strong client communication and project management skills.
- Contributed to brand visibility strategies, translating business requirements into actionable technical and marketing solutions.

KEY PROJECTS & TECHNICAL CONTRIBUTIONS

Liquidity.io, Simplici.io, EquityTable.io (FinTech Suite)

- **Tech Stack:** Node.js, NestJS, Next.js, TypeScript, PostgreSQL, Supabase, Docker, Kubernetes, Redux, Jest
- Built scalable microservices architecture handling cap table management, SAFEs, and equity operations for enterprise clients
- Implemented comprehensive test coverage using Jest and Mocha, ensuring financial data accuracy and compliance

Infobricks (AI Pharma Document Automation)

- **Tech Stack:** Node.js, NestJS, Next.js, TypeScript, MongoDB, NeonDB, Docker, Jest, AI/ML APIs
- Developed AI-powered clinical trial document automation with template-driven generation, RAG, and agentic workflows
- Applied event-driven architecture with message queues for asynchronous document processing

SimplCase (Legal Tech Real-time Platform)

- **Tech Stack:** Node.js, Next.js, TypeScript, Socket.io, PostgreSQL, Docker, Mocha/Chai
- Built secure real-time chatbot with WebSocket connections, AI document insights, and case management features
- Implemented unit and integration tests using Mocha, Chai, and Sinon for WebSocket communication reliability

HRMS (HR Management System)

- **Tech Stack:** React.js, Node.js, Express.js, TypeScript, MongoDB, Supabase, Jest, Docker
- Developed employee management system with leave tracking, payroll, and RBAC using Node.js backend
- Achieved 85% test coverage with Jest, implementing TDD practices throughout development lifecycle

EDUCATION

- **M.Sc. in Information Technology** | Charusat University | 2023 – 2025 | CGPA: 8.18/10
- **B.Sc. in Information Technology** | Charusat University | 2020 – 2023 | CGPA: 8.84/10

CERTIFICATIONS & TRAINING

- React – The Complete Guide 2025 (Udemy) – Advanced React patterns and hooks
- AWS Certified Solutions Architect (AWS, 2024) – Cloud architecture and services
- Web Development Bootcamp (Udemy, 2024) – Full-stack development with Node.js
- UX Design Foundations (Google, 2024) – User-centered design principles
- Project Management Foundation (PMI, 2024) – Agile methodologies

ADDITIONAL STRENGTHS

- **Code Quality:** Strong advocate for clean code, static code analysis, ESLint, Prettier, and code review best practices
- **Problem Solving:** Analytical mindset with proven debugging and troubleshooting abilities across complex distributed systems
- **Collaboration:** Effective team player with excellent communication skills, experienced in cross-functional collaboration
- **Learning Agility:** Quick learner, staying current with latest Node.js/React ecosystems, frameworks, and industry best practices
