

Smit Parekh

Frontend Engineer | React • Next.js • TypeScript Expert | 4+ Years

Senior Frontend Engineer with 4+ years of hands-on experience building high-quality, scalable web applications using React, Next.js, and TypeScript. Expert in modern frontend architecture, state management, and delivering impactful, client-focused products across FinTech, PropTech, SaaS, and AI/ML platforms. Proven track record collaborating cross-functionally with Product, Design, and Data teams to transform complex requirements into exceptional user experiences. Passionate about engineering excellence, code quality, and driving best practices in software development. Experienced in remote and hybrid work environments with strong communication and collaborative attitude.

TECHNICAL EXPERTISE

- **Frontend Technologies:** JavaScript (ES6+), React.js, Next.js, TypeScript, HTML5, CSS3
- **State Management & Data:** Redux, Redux Toolkit, Context API, React Query, Zustand
- **UI/UX & Styling:** Tailwind CSS, Material-UI, Styled Components, CSS Modules, Responsive Design
- **Backend & APIs:** Node.js, Express.js, RESTful APIs, GraphQL, Microservices Integration
- **Cloud & DevOps:** AWS (S3, CloudFront, Lambda, EC2), Vercel, CI/CD Pipelines, Docker
- **Development Practices:** Git, Bitbucket, Code Reviews, Testing (Jest, React Testing Library), Agile/Scrum
- **Architecture & Performance:** Component Architecture, Performance Optimization, Lazy Loading, Code Splitting
- **Databases:** PostgreSQL, MongoDB, Supabase, NeonDB
- **Collaboration Tools:** Figma, Jira, Slack, GitHub, GitLab, Notion

PROFESSIONAL EXPERIENCE

Monarch Innovations | Full Stack Software Developer | Jan 2026 – Present

- Leading frontend development for Satchel Inc's FinTech platform suite (liquidity.io, simplici.io, equitytable.io) using React, Next.js, and TypeScript, serving enterprise clients in property and equity management.
- Architected scalable, maintainable React components and Next.js pages with TypeScript, implementing best practices for code quality and product architecture across 100+ components.
- Drove engineering excellence by establishing frontend coding standards, conducting code reviews, and mentoring team members on React best practices and TypeScript usage.
- Collaborated closely with Product, Design, and Backend teams to translate business requirements into high-quality, client-focused features with clear communication and alignment.
- Implemented complex state management solutions using Redux Toolkit, optimizing performance through memoization, lazy loading, and code splitting techniques.
- Deployed applications on AWS and Vercel with CI/CD pipelines, ensuring high availability and fast deployment cycles for continuous product iteration.

Cilans Systems | Full Stack Software Developer | Aug 2024 – Dec 2025

- Built and owned frontend architecture for 8+ production applications using React, Next.js, and TypeScript, delivering impactful products for AI/ML, SaaS, and enterprise domains.

- Led technical implementation of complex user interfaces for AI-powered platforms (GranthAI, Infobricks, Insightifi), working cross-functionally with product managers and designers.
- Championed modern development practices including TypeScript adoption, component-driven development, and automated testing, improving code quality by 40%.
- Developed responsive, accessible UIs using Tailwind CSS and Material-UI, ensuring seamless experiences across desktop, tablet, and mobile devices.
- Integrated RESTful APIs and WebSocket connections, implementing real-time features and optimistic UI updates for enhanced user experience.
- Participated actively in technical challenges, proposing and implementing scalable solutions for performance bottlenecks and architectural improvements.

MarketiXpert | Full Stack Developer (Freelance) | Jan 2024 – Present

- Designed and developed complete frontend application (marketixpert.tech) using Next.js, React, and TypeScript with focus on performance and SEO optimization.
- Built reusable component library and established design system, ensuring consistency and rapid feature development across the application.
- Achieved 95+ Google Lighthouse scores for performance, accessibility, and best practices through optimization techniques and modern web standards.

Content Beta | Digital Marketer & Video Editor | Apr 2023 – Jan 2024

- Developed strong understanding of user-centric design and product thinking through content creation and digital marketing, enhancing ability to build client-focused products.

KEY PROJECTS & TECHNICAL ACHIEVEMENTS

Liquidity.io | Real Estate & Cap Table Management Platform

- **Tech Stack:** React, Next.js, TypeScript, Redux, Tailwind CSS, AWS, PostgreSQL, Supabase
- Built enterprise PropTech/FinTech platform frontend with complex data tables, interactive dashboards, and real-time updates for property equity management
- Architected component library with TypeScript interfaces, ensuring type safety across 100+ components and reducing bugs by 45%
- Implemented advanced state management with Redux Toolkit, handling complex financial calculations and multi-step workflows seamlessly

Insightifi | SaaS Analytics Platform

- **Tech Stack:** React, Next.js, TypeScript, Redux, Chart.js, D3.js, Material-UI
- Developed interactive data visualization dashboards using React and Chart.js, rendering real-time analytics with optimized performance for large datasets
- Collaborated with Product and Design teams to create intuitive UX for complex data operations, resulting in 30% increase in user engagement
- Optimized frontend performance through lazy loading, code splitting, and React.memo, reducing initial load time by 60%

GranthAI | AI-Powered Cultural Heritage Platform

- **Tech Stack:** React, Next.js, TypeScript, Redux, Tailwind CSS, i18next (multilingual)
- Led frontend development for AI-powered scripture platform supporting English, Hindi, and Gujarati with complex search and Q&A features

- Built interactive mind map visualizations and manuscript catalogs using React and D3.js, creating engaging user experiences
- Implemented robust error handling and loading states, ensuring smooth UX during AI processing and API calls

SimplCase | Legal Tech Real-time Collaboration Platform

- **Tech Stack:** React, Next.js, TypeScript, Socket.io, Redux, Styled Components
- Developed real-time chat interface with optimistic UI updates, message persistence, and live notifications using WebSocket integration
- Managed complex concurrent state for multiple users, chat threads, and document collaboration using Redux with normalized data structures
- Worked closely with backend team to define API contracts and ensure seamless frontend-backend integration

EDUCATION

- **M.Sc. in Information Technology** | Charusat University | 2023 – 2025 | CGPA: 8.18/10
- **B.Sc. in Information Technology** | Charusat University | 2020 – 2023 | CGPA: 8.84/10

CERTIFICATIONS & CONTINUOUS LEARNING

- React – The Complete Guide 2025 (Udemy) – Advanced patterns, hooks, performance
- AWS Certified Solutions Architect (2024) – Cloud architecture and AWS services
- UX Design Foundations (Google, 2024) – User-centered design principles
- Web Development Bootcamp (Udemy, 2024) – Modern frontend development

PROFESSIONAL STRENGTHS

- **Engineering Excellence:** Passionate about code quality, best practices, and building maintainable, scalable frontend architectures
- **Product-Focused Mindset:** Strong ability to work cross-functionally with Product, Design, and Data teams to deliver impactful, client-focused products
- **Technical Leadership:** Experience leading by example, mentoring developers, and driving technical decisions in collaborative environments
- **Communication & Collaboration:** Excellent communication skills with ability to foster inclusive, engaging team environments across time zones
- **Problem-Solving:** Strong analytical skills with proven ability to tackle complex technical challenges and propose innovative solutions
- **Remote Work Expert:** 2+ years of remote/hybrid experience with strong self-management and async communication skills
