

Smit Parekh

Full Stack Developer | React + Node.js Expert | 4+ Years

Innovative Full Stack Developer with 4+ years of hands-on experience building modern, responsive web applications using React and Node.js. Expert in TypeScript, Redux state management, PostgreSQL databases, and RESTful API design. Proven track record delivering high-quality solutions across FinTech, AI/ML Platforms, SaaS, and enterprise domains. Strong proficiency in AWS cloud services, Docker containerization, and implementing best practices for scalable architectures. Collaborative team player with excellent communication skills and passion for creating user-friendly, performant applications. Experienced in remote work environments with ability to manage flexible schedules and deliver results independently.

CORE TECHNICAL SKILLS

- **Frontend Development:** React.js (4+ years), Next.js, JavaScript ES6+, HTML5, CSS3, Responsive Design
- **Backend Development:** Node.js, Express.js, NestJS, RESTful API Design & Implementation
- **Programming Languages:** TypeScript (Proficient), JavaScript, SQL, PHP
- **State Management:** Redux, Redux Toolkit, Context API, Zustand
- **Databases:** PostgreSQL (Advanced), MongoDB, Supabase, NeonDB, SQL Query Optimization, Database Design
- **Cloud & DevOps:** AWS (EC2, S3, Lambda, RDS, CloudWatch), Docker, Vercel, CI/CD Pipelines
- **UI Frameworks & Styling:** Tailwind CSS, Bootstrap, Material-UI, Styled Components, CSS Modules
- **Testing & Quality:** Jest, React Testing Library, Mocha, Chai, Unit & Integration Testing
- **Version Control & Tools:** Git, GitHub, GitLab, Bitbucket, Jira, Slack, Agile/Scrum Methodologies
- **Best Practices:** Code Reviews, Clean Code, Design Patterns, Performance Optimization, Security

PROFESSIONAL EXPERIENCE

Monarch Innovations | Full Stack Software Developer | Jan 2026 – Present

- Developed modern FinTech web applications (Satchel Inc suite: liquidity.io, simplici.io, equitytable.io) using React, Node.js, TypeScript, PostgreSQL, and Supabase for enterprise clients.
- Implemented complex state management solutions using Redux Toolkit, managing multi-tenant application state across 50+ components with optimized performance.
- Designed and built RESTful APIs using Node.js and Express, integrating with PostgreSQL and NeonDB databases for financial data operations with 99.9% uptime.
- Created responsive, user-friendly interfaces using React and Tailwind CSS, ensuring seamless experience across desktop and mobile devices.
- Deployed applications on AWS infrastructure using EC2, RDS (PostgreSQL), S3, and implemented Docker containerization for consistent environments.
- Collaborated with cross-functional teams (designers, product managers, QA) in remote work environment, delivering features on schedule through effective communication.

Cilans Systems | Full Stack Software Developer | Aug 2024 – Dec 2025

- Built and maintained 8+ production applications using React, Next.js, Node.js, and TypeScript, serving thousands of users across AI/ML, SaaS, and enterprise domains.

- Architected RESTful APIs for frontend-backend communication, implementing authentication, authorization, and data validation using Node.js and Express.
- Managed application state using Redux and Context API, optimizing re-renders and implementing memoization techniques for 40% performance improvement.
- Created and optimized PostgreSQL, Supabase, and NeonDB database schemas, queries, and migrations, ensuring data integrity and supporting complex business logic requirements.
- Participated in code reviews, implementing best practices for React hooks, component composition, and TypeScript type safety across team codebase.
- Utilized Docker for local development and deployment, creating containerized environments for Node.js applications with multi-stage builds.

MarketiXpert | Full Stack Developer (Freelance) | Jan 2024 – Present

- Designed and developed full-stack application (marketixpert.tech) using Next.js (React framework) and Node.js backend with TypeScript throughout.
- Implemented RESTful API endpoints for content management, user authentication, and analytics tracking using Express.js and PostgreSQL.
- Built responsive UI components with React, managing global state with Context API and implementing custom hooks for reusable logic.
- Deployed on Vercel with automated CI/CD pipeline, achieving 95+ Google Lighthouse scores for performance and accessibility.

Content Beta | Digital Marketer & Video Editor | Apr 2023 – Jan 2024

- Developed creative content and managed digital campaigns, building strong communication skills and understanding of user-centric design principles.

KEY PROJECTS & TECHNICAL ACHIEVEMENTS

Liquidity.io | Cap Table Management Platform

- **Tech Stack:** React, Next.js, TypeScript, Node.js, Express, PostgreSQL, Supabase, Redux, AWS, Docker
- Built enterprise FinTech platform with complex React components for equity management, shareholder tracking, and financial reporting
- Implemented Redux for managing complex application state across 100+ components with normalized data structures
- Designed RESTful APIs with Node.js handling 10,000+ daily requests, integrating with PostgreSQL for transactional operations

Insightifi | SaaS Analytics Platform

- **Tech Stack:** React, Next.js, TypeScript, Node.js, PostgreSQL, NeonDB, Redux, Chart.js, AWS
- Developed data visualization dashboards using React and Chart.js, rendering real-time analytics for business intelligence
- Created RESTful API endpoints for data aggregation, filtering, and export functionality using Node.js and PostgreSQL
- Optimized PostgreSQL queries with indexing and caching strategies, reducing API response times by 65%

SimpliCase | Legal Tech Real-time Platform

- **Tech Stack:** React, Next.js, TypeScript, Node.js, Socket.io, PostgreSQL, Redux

- Built real-time chat interface using React and Socket.io with optimistic UI updates and message persistence
- Implemented WebSocket server with Node.js for bidirectional communication and real-time notifications
- Managed complex UI state with Redux, handling concurrent users, message threads, and document collaboration features

HRMS | Employee Management System

- **Tech Stack:** React, Node.js, Express, TypeScript, MongoDB (migrated to PostgreSQL), Supabase, Redux
- Developed responsive React application with role-based access control, form validation, and data tables
- Created Node.js RESTful API with Express for leave management, payroll processing, and employee records
- Migrated from MongoDB to PostgreSQL and Supabase, designing relational schema and optimizing queries for complex HR operations

EDUCATION

- **M.Sc. in Information Technology** | Charusat University | 2023 – 2025 | CGPA: 8.18/10
- **B.Sc. in Information Technology** | Charusat University | 2020 – 2023 | CGPA: 8.84/10

CERTIFICATIONS

- React – The Complete Guide 2025 (Udemy) – Advanced patterns, hooks, and performance optimization
- AWS Certified Solutions Architect (AWS, 2024) – Cloud architecture and AWS services
- Web Development Bootcamp (Udemy, 2024) – Full-stack development with Node.js and React
- UX Design Foundations (Google, 2024) – User-centered design and accessibility

ADDITIONAL INFORMATION

- **English Proficiency:** Professional working proficiency (written and verbal communication)
- **Remote Work:** 2+ years experience working in distributed teams across time zones
- **Work Style:** Self-motivated, flexible schedule management, strong async communication skills
- **Continuous Learning:** Active learner staying updated with React, Node.js ecosystems, and emerging web technologies
- **Collaboration:** Experienced in code reviews, pair programming, and mentoring junior developers
